FULL STACK DEVELOPER

Summary

Dynamic Full Stack Developer with extensive experience in designing, developing, and deploying scalable web applications using modern technologies such as Node.js, React, Next.js, TypeScript, Express, PostgreSQL, MongoDB, AWS, and Prisma. Adept at creating efficient back-end systems, RESTful APIs, and engaging user interfaces, with expertise in optimizing query performance and implementing CI/CD pipelines in cloud-based environments.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, C++
- **Front-End:** React.js, React Native , Next.js, Redux Toolkit, MUI, PrimeReact
- **Back-End:** Node.js, Express.js, Prisma ORM,Mongoose
- **Database:** PostgreSQL, MongoDB
- **Cloud & DevOps:** AWS (S3, EC2, RDS, Lambda), Docker, CI/CD Pipelines
- **Other Tools & Libraries:** Socket.IO, React Query, Ant Design, REST APIs

PROFESSIONAL EXPERIENCE

Web Pioneer Solution, Bahawalpur
Full Stack Developer
November 2024 – Present

- Engineered scalable and secure server-side applications using Node.js with TypeScript and Prisma ORM, improving query performance by 15%.
- Delivered responsive front-end solutions with React.js and Next.js, ensuring cross-platform compatibility and reducing load times by 20%.
- Deployed cloud-based storage solutions with AWS S3, optimizing file management and ensuring high availability.
- Planned and maintained production-ready applications on AWS EC2, ensuring 99.9%

uptime and cost-effective system performance.
- Incorporated CI/CD pipelines, reducing deployment time by 30% and enhancing application quality.

Code's Thinker, Bahawalpur
Team Lead | Full Stack Developer
August 2023 – November 2024

- Built scalable server-side applications with Node.js, TypeScript, and Prisma ORM, handling PostgreSQL and MongoDB databases.
- Designed RESTful APIs, enhancing data exchange between front-end and back-end, improving system efficiency by 25%.
- Led a team of developers, mentoring members and streamlining development processes, increasing team productivity by 40%.
- Utilized AWS Lambda for serverless functions, reducing infrastructure costs by 20% while maintaining system reliability.

PROJECTS

Clikkle | clikkle.com
Full Stack Developer

- SaaS platform offering cloud storage, e-signatures, ad services, and secure email.
- Managed MongoDB databases, improving data retrieval times by 20%.
- Devised admin control panels with React.js and Node.js, enhancing UI/UX for better usability and performance.
- Incorporated cloud services for storage and hosting, ensuring fault tolerance and reducing downtime by 10%.

Gofilez | gofilez.com
Full Stack Developer

- A cloud storage web application offering file storage, sharing, and management
- functionalities.
- Leveraged AWS S3 for secure file storage and AWS RDS for structured data
- management, improving storage efficiency by 30%.
- Deployed the application on AWS EC2, ensuring high performance and reliability, with
- 99.9% uptime.
- Enhanced the back-end using Node.js, TypeScript, and Prisma ORM, optimizing
- database queries and improving performance by 15%.

School Management System | lms-client-hazel.vercel.app
Full Stack Developer

- A platform for managing school operations, including grading, attendance, and reporting.
- Built scalable PostgreSQL databases to handle large volumes of data, improving query

efficiency by 25%.
- Established back-end logic using Node.js and TypeScript, supporting dynamic platform features and enhancing performance by 20%.
- Utilize an admin dashboard with Next.js and PrimeReact for real-time analytics, improving user management efficiency.

Anesthesiology Quiz Testing App | mvpdemo.info
Full Stack Developer

- A quiz application for anesthesiology exam preparation.
- Pioneered MongoDB databases for storing quiz questions and analytics.
- Built RESTful APIs using Node.js and Express.js, enhancing communication between front-end and back-end.
- Incorporated Redux Toolkit for state management, improving user experience and application speed.

Lusail Numbers | lusailnumbers.com
Full Stack Developer

- A number plate marketplace for Qatar built with React.js, Node.js, and MongoDB.
- Merged Socket.IO for real-time chat between buyers and sellers, improving communication by 40%.
- Generated APIs for authentication, listings, and transactions, enhancing system security and data flow.
- Developed a scalable backend with Express.js, ensuring high availability and performance.
- Deployed the application on a scalable hosting solution for optimized user experience.

AdvocateIron | advocateiron.tech
Full Stack Developer

- AI-powered platform connecting clients with lawyers for Q&A and case management.
- Initiated robust databases for case searches and user management, optimizing data handling for faster queries.
- Integrated backend functions for efficient lawyer-client interactions.
- Built a responsive front end to enhance accessibility and user engagement.

POS for Hotel
Full Stack Developer

- A Point of Sale system for hotel management launched using React.js and converted into a desktop application with Electron.js.
- Created interactive and user-friendly interfaces with React.js.
- Implemented back-end logic with Node.js for robust POS functionalities.
- Incorporated Electron.js to convert the web app into a cross-platform desktop application.

EDUCATION

Islamia University Bahawalpur
ADP(Computer Science) (2023 – 2025)
